

Limit COVID-19 transmission in hospitals, whilst maintaining a high standard of patient care and experience.

Enable patients to digitally order their meals, make non-urgent requests and for staff to field and respond to these requests without the need for person to person contact.

Adoption of the technology will result in a drastic reduction in the possibility of COVID-19 viral transmission, whilst continuing to maintain a high standard of patient care and experience.

Developed in Brisbane, the globally deployed and award-winning REVA Anywhere platform is a modern mobile ordering and comprehensive guest engagement solution. Originally developed for the hotel and resort industry, it's adaptation to the hospitals vertical during this pandemic, will yield immediate results.

A complete mobile ordering application for hospital F&B ordering and non-urgent requests. Enable patients to interact seamlessly with hospital digitally from their own device.

Our proprietary and patent-pending location technology enables staff to determine a patient's location to less than 1 meter.

Drastically reduce the need for patient > staff contact for non-essential / care related issues. Decreasing the instances of COVID-19 transmission.

Patients and staff can interact with the application in their language of choice. We have over 15 language options available.

We seamlessly integrate with the world's leading Property Management Systems and Point of Sale systems. Over 20 integrations to date and counting.

If payment for services are required, enable patients to pay with a wide range of payment types, from credit and debit cards to room charge and popular e-wallets including Alipay, Apple Pay & WeChat pay.

REVA Anywhere can be configured, branded, trained and deployed within a very short timeframe, allowing for an immediate response to the pandemic.

REVA Anywhere is mobile responsive as well as being device and operating system agnostic. From smartphone to tablet and PC you don't lose any functionality. Furthermore, they are web-based with no apps to download.

REVA Anywhere is designed to integrate with your existing communication channels. In addition to our applications, we provide widgets and links to add to your existing applications, websites and social media platforms.

REVA Anywhere is backed up with a strong commitment to training and support. We believe that your success is our success. You won't be left alone.
